

The Arab uprising will reach its true significance with the reaction to this aggression

The invasion of Libya must be stopped immediately!

The USA and its allies launched air and sea bombardments early today on Libya. According to received information, hundreds of rockets to tens of targets were launched from the war ships offshore of Libya. Ensuing aerial bombings of French and U.S war crafts organized attacks on various targets. According to Libyan health ministry 64 people have lost their lives, more than 150 wounded as a result of the attacks.

The USA: Nothing has changed

The USA took action with a particular care not give an image of “*challenging the world on its own*” after a short period of ‘hesitation’ or ‘wait and see’ following the uprisings in the Arabic geography. **The aggression on Libya is a proof of the fact that the USA has never abandoned the lust to reconstruct the region including Middle East, North Africa, Mediterranean and Caucasia suitable to its interests in spite of the failure in Iraq as expected goals have not been attained and the entangled status of the invasion of Afghanistan.**

Turkey: If NATO in, then count me in

When a military intervention on Libya was at the top of the agenda, the JDP government stating “*What does NATO have to do in Libya?*” just threw out by its minister of foreign affairs that “*We consider the implementation of UN Security council’s decision to be important*”. According to the news during the day “*When NATO takes an action so will Ankara*”. It is too much of an optimism to expect the JDP government whose theories of “*brotherhood with peoples of Middles East*” has already collapsed several times to take another position.

NATO: Already taking actions

Aggression on Libya is presided by the US Africa Command. France, England and Italia as well as Canada, Spain, Denmark, Norway, the United Arab Emirates and Qatar support the operation. According to received information from various resources, the military bases of NATO are involved in the operation and the assault is operated through facilities of NATO. It means NATO is already taking action.

Imperialists, hands off the Middle East

We pointed out in our 5 March dated statement that “*While the Arab uprisings turn the old power balances upside down, the imperialist countries are increasing the efforts of directing and using the uprising powers according to their interests as well as preparing to invade Libya*”. Imperialism has not belied us once again.

Peace Lovers,

The time is to give stronger voice to “*USA, get out of the Middle East!*” The time is to yell out “*NATO is the enemy of the peoples of the world and peace*”. The time is to struggle “*against imperialism for peace*” more decisively.

USA, get out of the Middle East!

NATO is the enemy of the peoples of the world and peace!

Against imperialism for peace!

Peace Association of Turkey
